Doctor Profile

Orthopaedic Surgeon

Hip & Knee

Dr James Canty

MBBS, FRACS, FAOrthA

James is a locally and internationally trained hip and knee Orthopaedic surgeon, specialising in Robotic Hip and Knee replacement surgery, knee replacement, as well as sports knee surgery.

After finishing his Orthopaedic training in Melbourne, James subsequently undertook two internationally regarded fellowships. The first was under the guidance of John Bartlett in Melbourne and covered all aspects of knee surgery. He then spent 12 months in Oxford (UK) working in the renowned hip and knee unit of the Nuffield Orthopaedic Centre.

James was one of the first surgeons to embrace Mako Robotic Arm for joint replacement surgery in Victoria and continues to use Robotic arm-assisted surgery for all hip and knee Replacements. With robotic advances - as well as his passion for uni-compartmental knee replacement surgery - he is very much an advocate for shorter-stay joint replacement surgery and is very excited to be a part of the Adeney Private Hospital Orthopaedic Unit.

James currently holds a public appointment at Monash Health that allows him to be involved actively in orthopaedic research and training future orthopaedic surgeons.

James is a fellow of the Royal Australasian College of Surgeons and has memberships with the Australian Orthopaedic Association, Girdlestone Orthopaedic Society, American Academy of Orthopaedic Surgeons, and the International Society of Arthroscopy, Knee Surgery, and Orthopaedic Sports Management.

Areas of interest:

- Hip and Knee arthritis
- Soft tissue surgery of the knee
- Reconstructive surgery of the knee
- Orthopaedic trauma
