Doctor Profile

Medical Oncology

Dr Michael Lee

MBChB, FRACP

LANGUAGES: Mandarin

AREAS OF INTEREST: Gastrointestinal cancer, Neuroendocrine tumours.

Dr Lee is an experienced medical oncologist, sub-specialising in gastrointestinal cancers and neuroendocrine tumours at the Peter MacCallum Cancer Centre. He plays a key role in molecular tumour boards at VCCC and MPCCC, ensuring the accurate and effective application of precision medicine in cancer care across the state. His care philosophy, embodied in his practice name, "Can-Therapy," promotes a CAN-do approach to CANcer care: empowering patients to live well with cancer through cutting-edge research and personalised, values-driven care. Beyond the clinic, he leads research as a clinician scientist, developing therapeutic strategies that target RNA processing - the molecular blueprint cancer hijacks to fuel its growth and resistance - by altering its sequence, like changing words in a sentence to redefine cancer's trajectory. Supported by Pancare, the Paul Dear Post Doctoral Fellowship and his industry collaboration, his work aims to revolutionise outcomes for patients with this aggressive cancer by targeting its molecular foundation.

Dr Lee is also highly trained in the area of Molecular Testing and can offer patients after-hours Telehealth consultations.

Dr Lee is available to speak with GP's via direct mobile phone contact.

Contact Details:

PRACTICE ADDRESS: Cabrini Haematology & Oncology Centre
Level 2, Area E, 183 Wattletree Road Malvern VIC 3144

PRACTICE EMAIL: mogmaindesk@MelbourneOncologyGroup.com.au

PRACTICE PHONE: 03 9508 6161

PRACTICE FAX: 03 9508 6177

PRACTICE WEBSITE: <https://www.melbourneoncologygroup.com.au/>

MOBILE PHONE: 0478 666 866

HEALTHLINK: melbonco

ARGUS: mogargus@bigpond.com
