Doctor Profile Gastroenterology & Interventional Endoscop

Dr Jonathan Yong TAN

MBBS, FRACP

Languages: Mandarin

Dr Tan completed his core gastroenterology training at the Alfred Hospital Melbourne, aiding the completion of various clinical trials and presented his work at international landmark Gastroenterology conferences. Subsequently, Jonathan embarked on a one-year overseas interventional endoscopy fellowship refining his skills in ERCP and EUS in a renowned liver transplant and pancreatic centre in Vancouver Canada.

Jonathan currently holds a public appointment at Box Hill Hospital as a senior visiting medical staff and is actively involved in training registrars. Providing holistic care, with good communication to various health professions is a core value that Jonathan holds and actively participates in weekly multi-disciplinary meetings. He is happy to discuss any referrals from doctors on his mobile at any time. Jonathan is also able to converse in fluent Chinese. He enjoys spending his free time outdoors with his three kids.

Dr Tan sees patients with all aspects of gastroenterology and offers consultation through his main rooms at 83 Doncaster Road Balwyn North Vic 3104. His special interests are in colorectal cancer screening and prevention, managing pancreatic biliary pathology. DIRECT ACCESS Diagnostic gastroscopy and colonoscopy are offered ie. without needing a prior consult available for medically suitable patients with NO GAP for privately insured patients (who have hospital GAP coverage on their hospital insurance policy) by Dr Tan and his Anaesthetist team. Discounted rates for consultations are available for aged care pensioners. All referrals can be sent electronically to reception@melbgastro.com.au or via fax 99787869 and are generally seen within 2-3 weeks. Urgent referrals can be accommodated earlier upon request by the referring practitioner when specified.

Areas of Interest:

- Colorectal screening/prevention
- Pancreatic biliary pathology
- Interventional endoscopy including large polyp removal via EMR, small bowel examination via balloon Enteroscopy, management of Pancreatic biliary conditions through ERCP and Endoscopic ultrasound.
